Café chairs, drafting stools, side and lounge chairs are also available. With modern, traditional and customizable options to choose from, there truly is a seat for every room.

chair FUNCTIONS

■ RGS chair functions are denoted by these symbols on each product.

■ Back Height, Arm Height and Overall Dimensions are measured from the floor when the chair is in its lowest position.

360 degree swivel

Chair is able to rotate 360 degrees in either direction.

back flex

Chair back reclines as the seat remains in a fixed position.

seat height

Chair's seat can raise and lower allowing the user's feet to remain flat on the floor.

back height

Chair back can be positioned in a range of heights that adds support to the users back.

arm height

Raise and lower to support users forearms and reduce neck and shoulder stress.

arm width

Adjust the gap between arm rests to accommodate arm separation.

arm rotation

Rotate the arm position to the angle of your forearm in keyboard tasks.

seat depth

Slide mechanism allows the user to adjust the distance between the seat and the back.

center tilt

Central pivot point allows the user to recline seat and back of chair at a fixed angle.

2:1 synchro tilt

Back reclines at a 2 to 1 ratio with the seat for a more comfortable angle.

knee tilt

Pivot point near the front of the chair allows the user to recline with feet remaining flat on the floor.

independent tilt

Control the seat back angle, forward tilt and infinite tilt positioning independently.

forward tilt

Adjust seat angle forward and rearward to improve posture for keyboard tasks.

tilt tension

Allows user to adjust the amount of force that it takes to adjust the seat back angle.

tilt lock

Locks the chair's back angle and inhibits it from being repositioned.

infinite tilt lock

Allows the user to adjust and lock the chairs tilt in an "infinite" amount of angles.

If damage is discovered, either visibly on the carton or concealed, retain all product and packaging for inspection by the freight carrier.
